

## **TITLE OF PRACTICE: PERIODICAL GUARDIAN MEETINGS**

**Goal:** The main purpose of guardian meeting is to make an environment where guardian of the students can easily approach and share their views with the teachers & administration and vice-versa to make teaching learning more effective in college.

### **The Context**

Education is a process where environment both home and institutional play a vital role. If any of the environments is not educational friendly, then it certainly hampers the education of the child. Keeping this important factor in mind, IQAC Amguri College stated this practice so that students can get a better educational environment in home as well as in college.

### **The Practice:**

After the weekly examination IQAC, Amguri College do call a guardian meeting to discuss the results of the students. In the meeting, teachers of the concerned examination analysed and discussed the results before the guardians and other teaching staffs. Teachers and parents are also shared their views.

### **Evidence of success:**

We are getting a good response from the guardians of the students. Now, they are more concerned about their children's studies as they are also present in the meeting where their children's results are discussed. Moreover, they provide a scientific educational environment to their children at home.
